Linux, Internal Tools & Workflow Automation

I configure Linux environments, direct tool development, and test workflows by hand.

Selected projects

BWS Planner · Used for studio demos

- Designed and used a guided workflow from inquiry and interview to reviewed scope and reusable build packs for studio demos.

Knowledge Viewer + Field Manual · In daily use

- Use a private homelab reader to find Git-backed runbooks from my phone or computer, with name search and separate scratch notes.

Insight BJJ website + preorders · In use

- Scoped trial intake with saved leads and email alerts. Follow up by phone or text.
- Set up a private manager to review catalog requests, send Stripe invoices, and track weekly gear orders through pickup.

MatManager · In development

- Defined family onboarding, dated schedules, class check-in, and attendance reporting for a BJJ academy app in testing.

Technical skills

Linux administration · SSH, tmux, Tailscale · Git and GitHub · Docker, Coolify, basic DNS · Reading Python, JavaScript, and SQL · Supabase dashboard · Functional and usability testing

---

Professional experience

Owner-operator · Bradford Web Solutions

Independent web development

- Scope web projects and test them in the browser before deployment.
- Run private previews on a Debian homelab. Deploy to Hetzner with Coolify.

Technical English Instructor (ESL) · Independent Contractor

August 2021–present · Remote

- Delivered 9,000+ one-on-one lessons, including to developers and technical professionals.
- Adapt lessons for technical project discussions, interviews, and presentations.

Parts Specialist · Don Franklin Hyundai

June 2017–October 2021 · Lexington, Kentucky

- Researched vehicle-part compatibility and resolved ordering and record discrepancies.

Education & languages

Linux Foundation Certified System Administrator (LFCS) exam preparation in progress

High School Diploma · Boyle County High School

English: native · Brazilian Portuguese: fluent
